Descriptors-Elementary Education, Enrollment, *Organization Size (Groups), Part Time Teachers, *Public School Adult Education, Questionnaires, Secondary Education, *Statistical Data, Teacher Qualifications, *Teachers, *Teacher Salaries

This report provides statistical information on adult education programs in school systems with enrollments of 6,000 or more. Data were obtained from the questionnaire used in connection with the Research Division's annual salary schedule studies. Three summary tables as well as listing of the individual systems are included. Table I shows, by enrollment groups, the number of reporting systems with enrollments of 6,000 or more; table II reports the enrollment and number of teachers in elementary and/or secondary school systems and in adult education programs; table III indicates the distribution of maximum hourly rates paid to adult education teachers as well as means, medians, and ranges of the rates. This report is not an all inclusive study of adult education programs throughout the United States. The summary tables contain data only on those systems in the individual listing. (nl)

RESEARCH MEMO 1968-16 December 1968

ADULT EDUCATION STATISTICS, 1968-69

This report provides statistical information on adult education programs in school systems with enrollments of 6,000 or more. Data were obtained from the questionnaire used in connection with the Research Division's annual salary schedule studies. Of the 841 systems listed by name in the detailed table attached, 714 reported adult education programs, and 127 reported that they had no adult education programs. Many of the systems without adult education indicated that these types of services are administered by community junior colleges and/or vocational-technical schools.

The majority of systems that reported salary data for adult education teachers compensate them on an hourly basis. In instances where a range of rates was reported for a given system, only the minimum and maximum figures appear. Several systems pay adult education teachers a specified percentage of the regular schedule for teachers. In these cases, when possible, minimum and maximum hourly rates were computed on the basis of the teachers' minimum and maximum scheduled salaries.

Three summary tables as well as a listing of the individual systems are included in this report. Table 1 shows by enrollment groups, the number of reporting systems with enrollments of 6,000 or more. Table 2 reports the enrollment and number of teachers in elementary and/or secondary school systems and in adult education programs. The total enrollment in reporting elementary and/or secondary school systems is 17,054,829; and in adult education classes, 1,305,681. Reporting elementary and/or secondary systems have a total of 702,600 classroom teachers and 46,033 adult education teachers. Of the adult education teachers, 39,248 are part-time teachers and 6,785 are full-time teachers. Table 3 indicates the distribution of maximum hourly rates paid to adult education teachers as well as means, medians, and ranges of the rates. The median hourly rate for all reporting systems is $6.00; the mean, $6.18. Hourly rates ranged from a low of $3.00 to a maximum of $25.00.

This report is <u>not</u> an all-inclusive study of adult education programs throughout the United States. The summary tables contain data only on those systems in the individual listing.
